

TOP KROP

SlowRelease 1985

Low salt, non-burning foliar fertilizer

- 19% nitrogen (72% slow release)
- 8% potassium and 5% sulphur
- Rate: 1.5 gallons (5.7 L) /acre

SlowRelease 28-0-0

The base of all TopKrop foliar products

- 28% nitrogen (72% slow release)
- Rate: Up to 2 gallons (7.5 L) /acre

Benefits of foliar nutrition products:

- Provides a balance of quick release nitrogen and slow release nitrogen for continuous feeding
- Sticks to the leaf and feeds the plant for up to 30 days
- Low salt, non-corrosive, and herbicide compatible
- Allows you to stage your fertility program in response to weather conditions and crop performance
- Plant health products mitigate disease pressure with chloride while delivering additional plant nutrients

SlowRelease Health 1458C

Promotes plant health and disease suppression

- 10% nitrogen (72% slow release)
- 4% phosphate, 5% potassium, 8% chloride
- Rate: 1.5 gallons (5.7 L) /acre

SlowRelease Health 1348C

Promotes plant health and disease suppression

- 10% nitrogen (72% slow release)
- 3% phosphate, 4% potassium, 8% chloride
- Rate: 1.5 gallons (5.7 L) /acre

How does foliar nutrition work?

- Increases chlorophyll concentration
- Increases photosynthesis rate
- Increases water and soil nutrient uptake
- Increases biomass
